DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The prior art submitted by applicant has been considered. See attached copy of form PTO-1449.

The IDS filed 02/07/02, 03/18/02, 08/06/02, 404/05/03, and 02/10/04, including related cases to the instant application, has been considered.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or suggest the claimed arrayed waveguide grating, wherein a number of the plurality of channel waveguides is determined such that a crosstalk is at most a predetermined value. Nor does the prior art disclose or suggest the claimed waveguide grating wherein a number of the plurality of channel waveguides is determined such that optical amplitude distribution at an interface between the first slab waveguide and one of the at least one first optical waveguide is substantially reproduced at interfaces between the second slab waveguide and the plurality of second optical waveguides. The prior art fails to disclose or suggest the waveguide grating, wherein a number of the plurality of channel waveguides is determined such that optical amplitude distribution transmitted in the arrayed waveguide includes only (emphasis added) main beam and first side lobes which appear on both sides of the

Art Unit: 2874

main beam. Nor does the prior art disclose or suggest the waveguide grating, wherein a number of the plurality of channel waveguides is determined such that optical amplitude distribution transmitted in the arrayed waveguide includes only main beam, first side lobes which appear on both sides of the main beam, and second side lobes each appearing on an outer side of each of the first side lobes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Akiba et al and He disclose different types of array waveguide gratings to reduce the cross talk. Inaba et al discloses artificial waveguides along a plurality of channel waveguides on both sides of array grating to improve crosstalk, however the artificial waveguides are not connected to slab waveguides as required in the claimed invention.
